
Naruto Abunai WIP

Posted by Pjotrkiller - 2009/05/14 17:24

This is our WIP Naruto MMORPG, we can use some more team members ;) Here is some information about it.

Naruto: Abunai is a Next Generation Massively Multiplayer Online Role-Playing Game based on Naruto.

Naruto is very popular world-wide and is a very complete world, which means that we should not have to use our imagination to create Naruto's world in a fully dynamic 3D environment. This manga does not have an end yet, that's why naruto's community is important and keeps growing.

In the first place we are making this game because we are fan of Naruto, in the second place we are making this game to get more experience in game making since our jobs and studies are not directly related to video game conception and making a MMORpg on our own would be a big plus on our resume. We also have in mind to open our own video game company based on this MMORpg

Our Goal is to Revolutionize MMORpg, by having your custom character to have the ability to altar the world around them wither it be earth base or blowing up stuff to possible changing the weather to utilize the elements it produces and all the other great Naruto stuff. The world will remain how you left it (With some exceptions)

Custom Character?

Yes Custom meaning you can be in any clan since we plan to Resurrect All the Clans known in the Naruto Anime/Manga We also plan to Make the Characters features Customizable (Gender, Height, Body Type, Appearance, Choice of Clan and their Unique Abilities, etc)

Pretty much what you see in the Manga and Anime we want in the game.

If you interested in Joining the Team to build this game read this first then check out Naruto-Abunai.com the forum link will be on the site

All applicants need experience in the relevant areas:

- Having worked on at least one project before, completed or abandoned. (Recommended but not Needed)

Team members are expected to work both diligently following directions and independently at other times, and must be somewhat talented as well as skilled in areas. Do not post an application if you are not up to the job.

Team Application:

Nick Name : (User Name)

Full Name : (Private Info can be sent to the Admins they will not release it therefore you can Remain "Anonymous until accepted")

Birthdate :

Applied Section : (3d, prog...)

Hours : (how many hours you plan to work on the game per week an approximate everyone has a life)

Commentary & Examples of Work : (If you want to add something like your experience, that you are a naruto fan...)

Note : If you refuse to Submit your Real Personal Information to the Admins once accepted is useless because we don't care and you won't get profit (if profit) from the game if you gave wrong information.

Thank you for your time. Peace

=====
